

Formal Naming Proposal for Seaford Kinder, Maternal Child Health and Youth Hangout

Background

As part of the Victorian Government's Kindergarten Reform and Building Blocks Partnership, Frankston City Council is undergoing a redevelopment of the Seaford Maternal and Child Health Centre, located at 41 Railway Parade, Seaford. The centre is undergoing expansion to incorporate a kindergarten and Maternal and Child Health Services with existing community services and programs.

This much-needed redevelopment will meet the growing demand for kindergarten places in Seaford and integrate the three facilities currently operating out of the site with improved infrastructure and connectivity.

The project will include:

- Demolition of the existing buildings and construction of a new single-storey integrated facility
- Expansion of the Seaford Kindergarten to provide increased capacity
- Construction of Maternal and Child Health consultation rooms
- Redevelopment of the youth space
- Construction of additional multipurpose room for playgrounds and family education
- Improved sustainability across the facility

The new facility is planned to be officially opened in February 2026, offering sessional hours for three- and four-year-old children alongside new Maternal and Child Health services and Youth Space community activities and programs.

The Seaford site was identified due to the ageing infrastructure and opportunity to integrate existing services into a purpose-built facility. The redevelopment of this facility is designed to support improved community access and lifelong connection to community and local service.
