To what extent do you support the current Vision Statement?

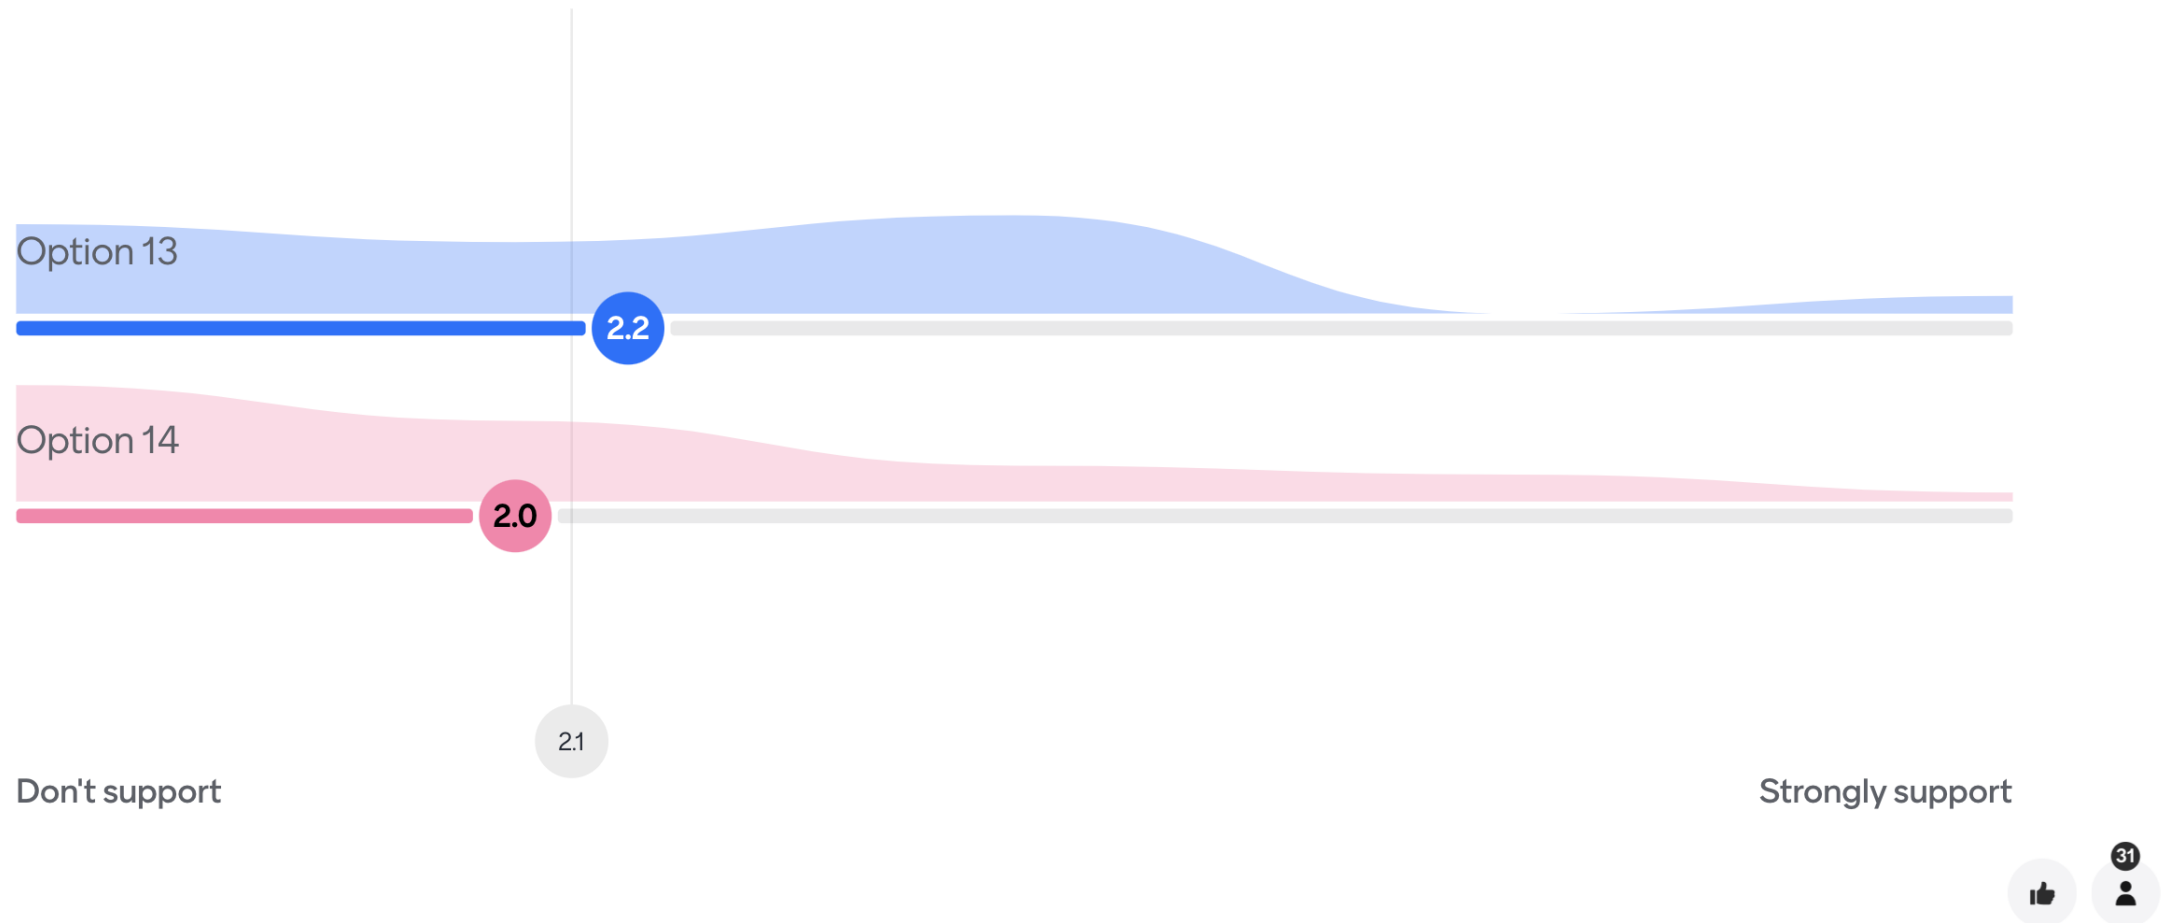

To what extent do you support these suggested changes to the Vision Statement?

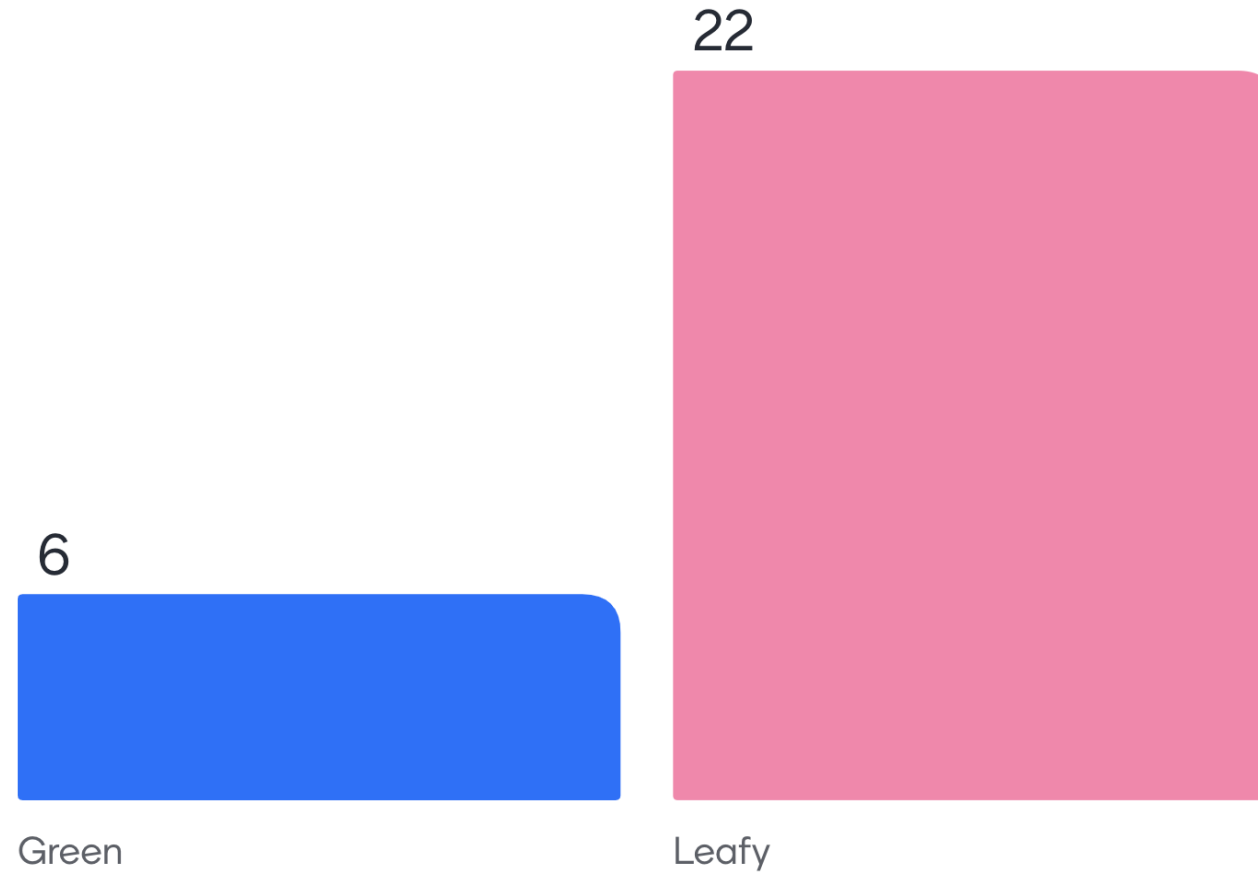

To what extent do you support these newly created options for the Vision Statement?

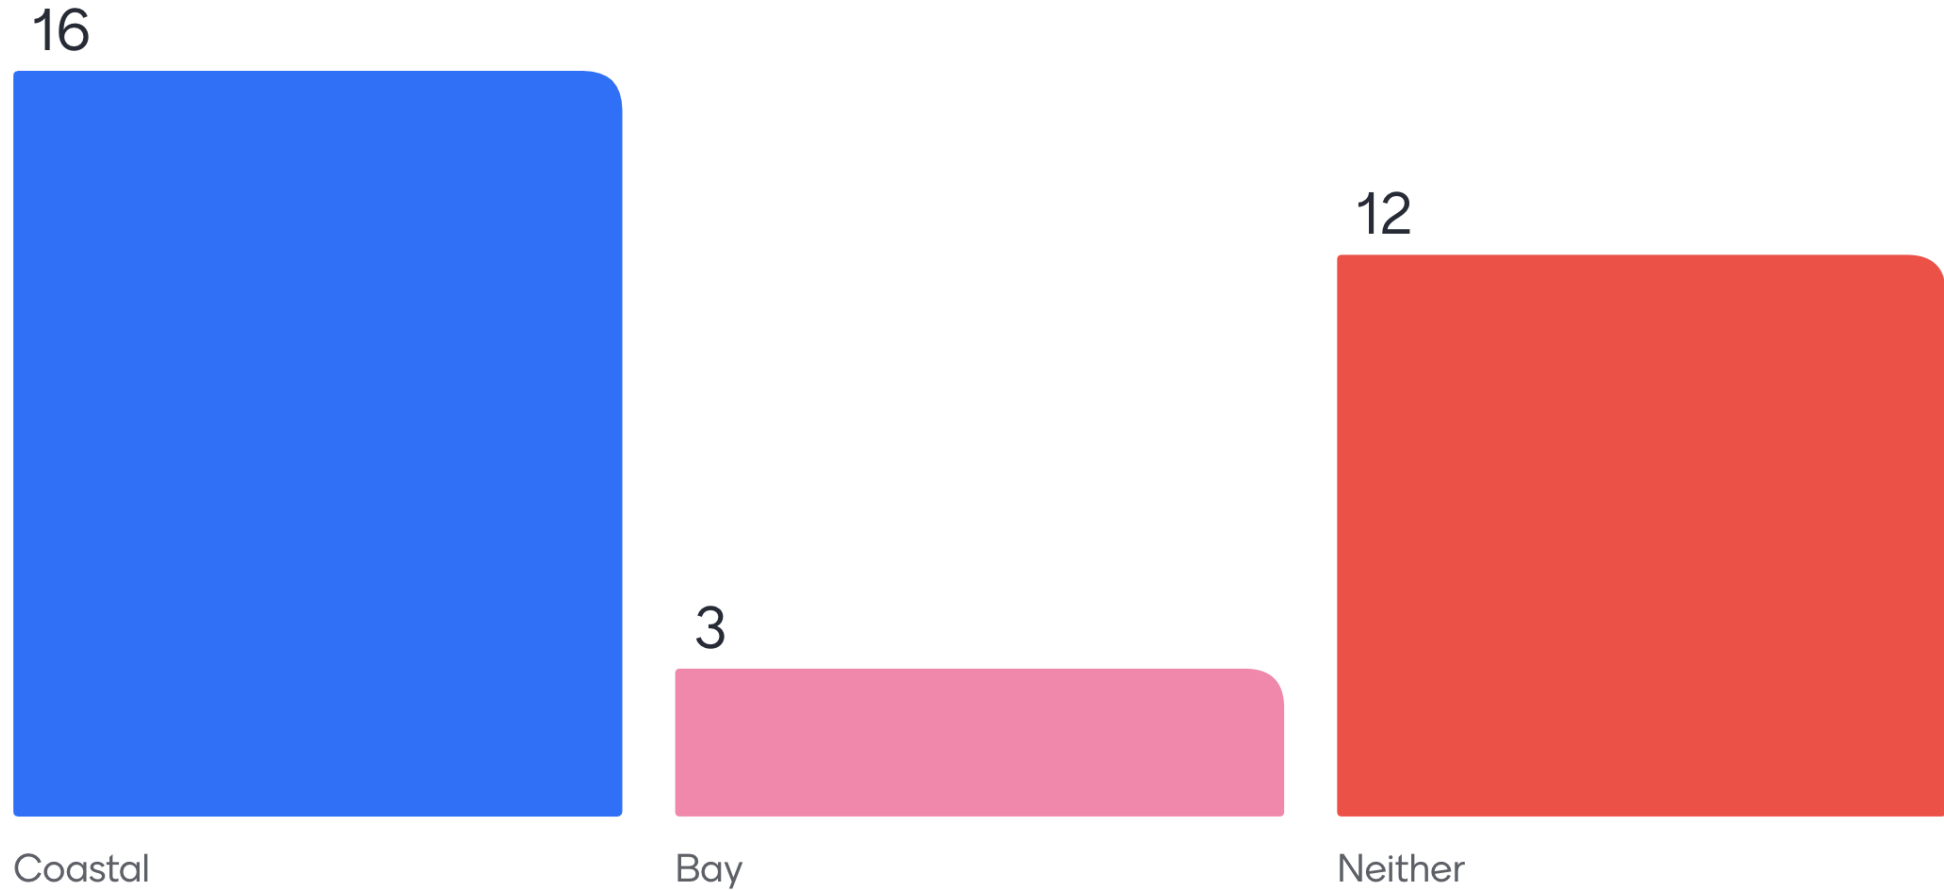

To what extent do you support these newly created options for the Vision Statement?

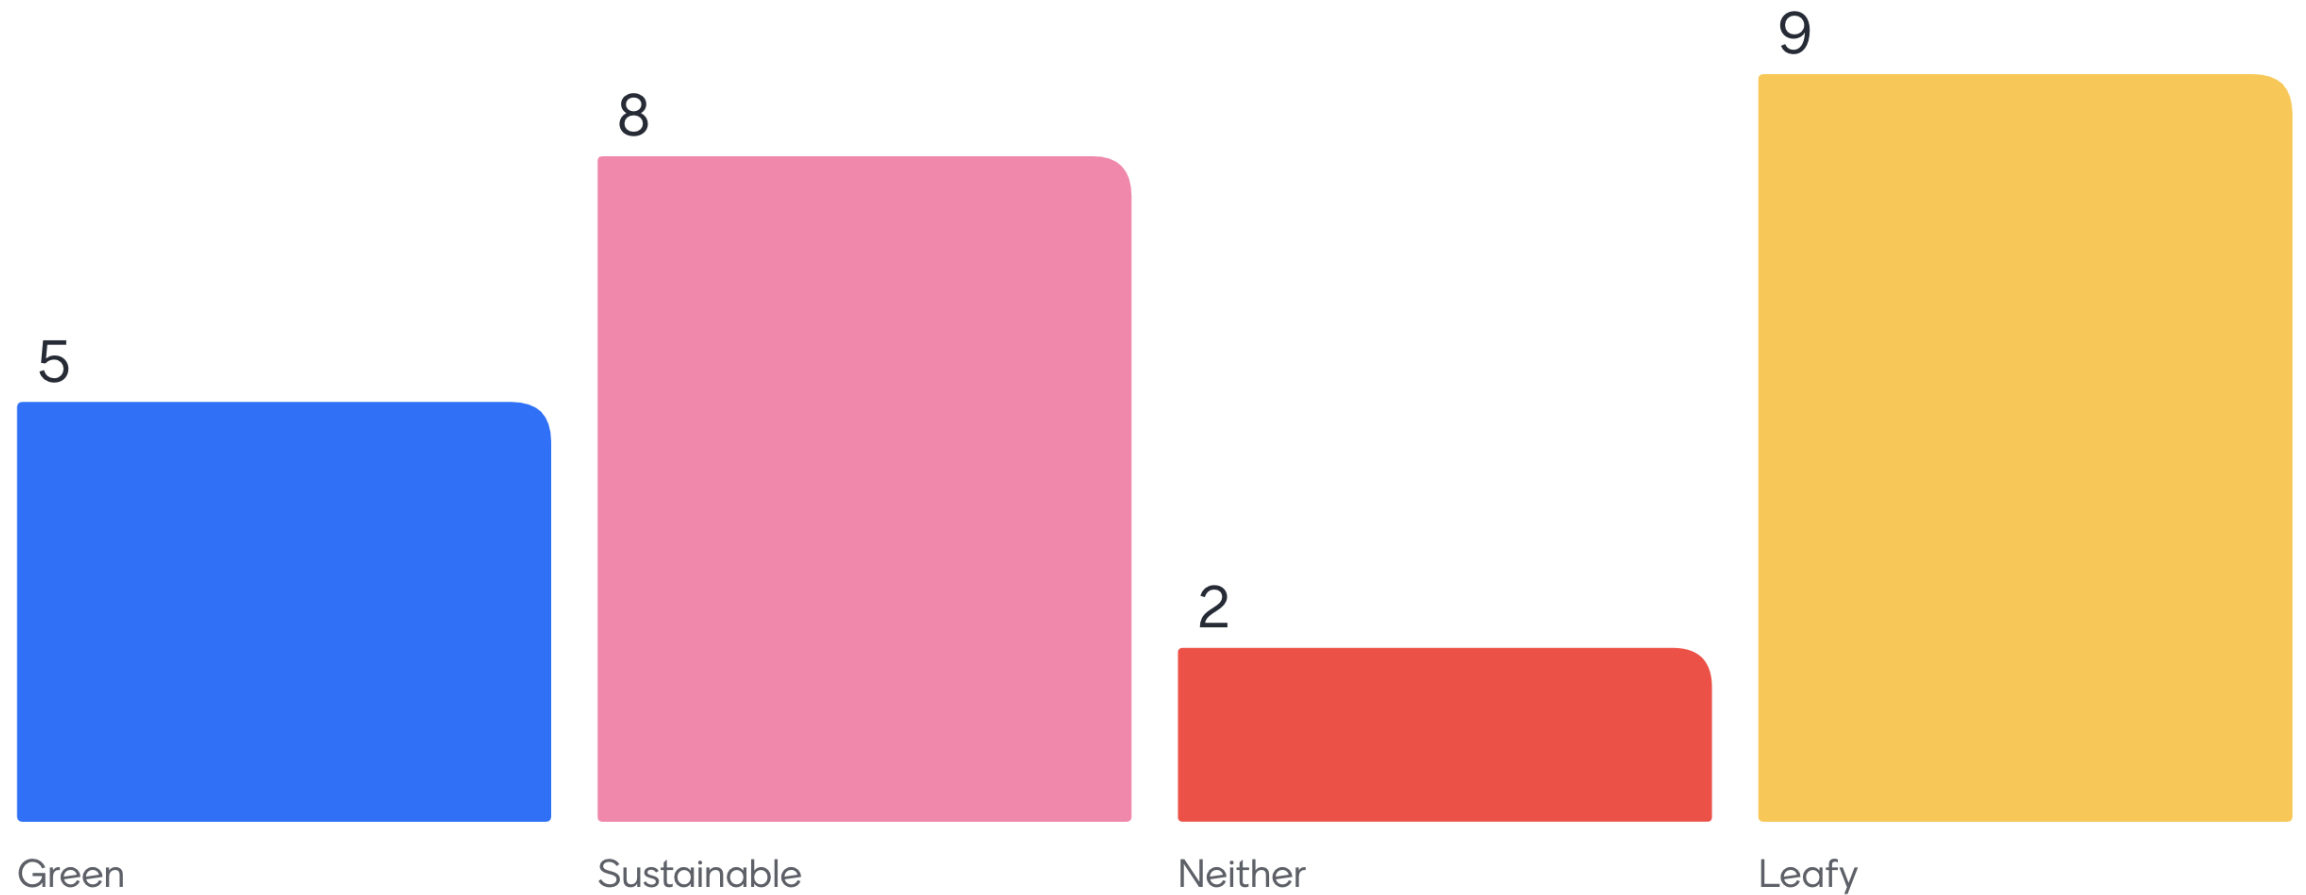

Preference for Green or Leafy

Coastal or Bay or Neither

Green

What comments or questions are top of mind for you at the end of this session?

More understanding the complexed issues - seeing active change

Reduction to 4 key areas is great. Caring for our people my preference

How well does council understand how the DTP's new planning powers will impact this process - especially no. 3?

The public intoxication acts and laws need to be reintroduced urgently at the state level. This needs to be advocated for. The Frankston CBD isn't safe or peaceful due to public drunkenness and worse

Coastal city needs to be mentioned in the vision. Yes realign the priorities

The well being of our environment will enhance the well being of our community

Bail Laws need to be strengthened.

The cobblestone road in Wells St is highly dilapidated and needs works done or relating altogether.

I think reducing it to four is worthwhile, and makes council matters more understandable to the community.

The work on individual vision statements should have been proceeded by the poll on compaign terms such as leafy and green

Foliage is growing over footpaths in Frankston north and other areas and creating pedestrian hazards and effecting posties and other delivery people.

I think belonging is equally important to pride. Especially with the loneliness epidemic we need to be more connected. Please include it in the vision statement as it is in option 5 :)

What is the council currently doing to attract business to Frankston. Is there any prospect of State government investing. Eg Geelong and tac / worksafe

On Tuesday- SAFTEY, healthy and employment and education need to be discussed. Sustainability has already been implemented with glass bottle bins.

Very disappointing that there wasn't time to discuss aspirations and future vision. 1 hour was lost at the beginning with introductions by council staff and presentations. 4 hours- one topic discussed

Presentations at the beginning of today's session took up too much of the time. Didn't utilise the group as well as you could have, if you had moved through this portion quicker.
